

17th November 2020

Dear Parents/Carers,

Advice to All Parents - Single cases

We were informed late yesterday by Public Health England that there has been three further unconnected and separate confirmed cases of COVID-19 within the College. The individuals have not been in college for 48 hours prior to developing symptoms. As a result, there are no requests for students or staff to isolate, however we have a duty of care to inform you.

We are in daily contact with Public Health England (PHE) regarding any possible link between cases in College and whether any further actions are required by College. PHE has confirmed there are no additional steps to be taken at this time, i.e. closing whole year group bubbles.

As you are aware, College has seen a number of single cases in this term. These are considered single cases as there is no traceable direct contact between the cases within College.

We know that you may find this concerning but we are continuing to monitor the situation and are working closely with Public Health England. This letter is to inform you of the current situation and provide advice on how to support your child. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

The College remains open and your child should continue to attend as normal if they remain well.

We know that you may find this concerning but we are continuing to monitor the situation and are working closely with Public Health England. This letter is to inform you of the current situation. Please be reassured that for most people, coronavirus (COVID-19) will be a mild illness.

What to do if your child develops symptoms of COVID 19

If your child develops any of the symptoms below please refer to the document on the website - *What to do if your child develops symptoms of COVID 19*

Symptoms

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell (anosmia)

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards

Yours sincerely

Mr M Gilmore
Principal
